

PSYCHOLOGY (BS)

Program Overview

Psychology is the scientific study of mind and behavior.

An undergraduate degree in psychology enhances career opportunities in many areas, and a graduate degree prepares students for professional careers in psychology and related fields. The Psychology Dept at CSU provides coursework leading to the Bachelor of Science (BS) degree. Students also have the opportunity to participate in CSU's pre-medical program for application to medical school.

Our faculty represent a diversity of psychology's specializations including counseling, cognitive, developmental, social, biological, and behavior analysis. The curriculum encompasses empirical, theoretical, and applied approaches, and students have opportunities to explore specialty areas within the discipline. Internships and independent study are available to qualified students.

Our research labs and facilities enhance the learning experience. We provide opportunities for student / faculty research collaborations leading to publications and presentations at professional conferences. We host a local chapter of Psi Chi, the International Honor Society in Psychology, as well as our own Psychology Club.

Career Opportunities

Graduates may find employment in many fields including human services, research, administration, psychological assessment, rehabilitation services, and veterans and victims advocacy. Click here to learn more <https://psyc.columbusstate.edu/StudentResources.php>.
