

# COURSE DESCRIPTIONS

This section is arranged alphabetically by subject designator and sequentially by course number. Numbers following a descriptive title of each course indicate the number of weekly class hours, the number of weekly laboratory or practicum hours, and the credit hour value of the course expressed in semester hours. For example, (2-2-3) following the course title means two class hours, two laboratory or practicum hours and three semester hours of credit. Braces enclosing a range of figures indicate that the hours are variable within the range given. For example, ({1-3}-0-{1-3}) indicates one, two or three lecture class hours, no laboratory hours and one, two or three credit hours.

Courses numbered 6000 and above are open only to graduate students. Courses with 5000 numbers are open to both graduate and advanced-standing undergraduate students.
